

Get yourself a CHAMPION

Dr. Joanna Bronson, DVM has provided BSB Quarter Horses with VersaTron® shock wave therapy since 2010.

“We believe using the Versatron® shock wave therapy regularly during breeding season has certainly helped keep “Too Sleepy To Zip” happy and comfortable. Stallions use and abuse their backs, hips and hamstrings while collecting and the VersaTron® shock wave therapy has greatly helped him. He enjoys his regular shock wave maintenance therapy.”
